R-Series Advanced Power Protection

A full line of products designed for the modern family with advanced features and characteristics needed for today's modern devices.

Smart UPS with Voltage Regulator

The R-Smart series features unsurpassed reliability for regions or countries with severe, chronic voltage problems. The built in voltage regulator has a very wide range of operation to correct brownout and high voltage conditions without using the battery. In the event that the voltage surpasses the set point or a blackout occurs the R-Smart will instantly switch to battery and provide up to 45 minutes* of battery power for you to save all of your open files.
